Attach your DISC test result and reflection.

Submit your completed document saved with your name.

First name: Muyiwa

Last name: Obadara

Email address: muyiwa.j.obadara@gmail.com

Post you are applying for: STEM Facilitator

Why are you currently looking for a new role? I have developed myself over the years and I want a higher pay

If you are leaving/have left your current role, whose decision, was it? (Please explain briefly.) My decision. For self-development / internship in tech

What are the 1-3 most important factors you are seeking in a new role/company? Impact, Company Growth

What do you view as the biggest advantage of working in a start-up? Potential disadvantage? Working in a start-up enables me to unleash my full potential, apply my creative thinking in developing intelligent strategies for the growth of the company.

What keeps you motivated at work? Periodic feedback, I need to know what I am doing right or wrong.

Tell us about your most impactful project. A Python package "torchflow" reducing deep learning training time.

What is a "superpower" you bring to our team? How could it also be a weakness? My superpower is analytical problem solving

If you were starting your own company, what would be its top three core values? Customer-centered, integrity and using the latest technology

Describe any STEM & Coding programs you have taught/implemented. (If none, state "Not yet.") I taught Frontend and Backend Development in a Private Polytechnic, and I have several years of experience teaching Physics and Mathematics.

Do you hold a TRCN, PDE, or other teaching certificate? No

One of our core values is HUSTLE. Own it and take it to the next level. Share an example of handling high work volume/tight deadlines

I remember a time that I have to mark and record exams for over 120 higher institution students in less than 24 hours. My thought of how it would be, when I finally complete the job kept me going.

One of our core values is PEOPLE DRIVEN. Share an example of making a positive impact on a client/colleague/customer. In a team, clear communication and being open-minded keeps the team working smoothly. I achieve this by not keeping new skills to myself alone.

Prepare a **10-minute interactive lesson** explaining a STEM concept to children aged 7–10. Use simple materials or visuals if needed. Be ready to present this during the interview.

Take this [DISC Personality Test](#) and submit your results. Write a **100-word reflection** on how your traits help you thrive in educational environments.

What is your expected annual salary? 3,000,000 NGN

Anything else you'd like us to know?
